**Paper Toss**
User Guide

When you open the game, you will see a room and a menu on the bottom-right corner where you can choose the difficulty of the game (seen as the weight of the ball), which are:

- Paper Ball (Default): Normal.
- PokeBall: Easy.
- Bowling Ball: Difficult

On the center of the screen, a brief description of the game is displayed and the instruction on how to use the controls to play. Once you are ready, you can click the "Play" button to start the game.

How to Play:

To specify the direction the ball will be tossed, you must use the W-A-S-D keys:

- W key: Moves the camera up (closer to the roof) and diminishes the power of the toss.
- A key: Moves the camera to the left, making the directional arrow point to the right.
- S key: Moves the camera down (closer to the table) and increases the power of the toss.
- D key: Moves the camera to the right, making the directional arrow point to the left.

Once you have positioned the direction as you wanted, it's time to make the shot. To shoot the ball you have to press the SpaceBar key.

If you successfully throw the paper ball into the trash can, you will score some points.

There are 3 different cameras that you can use to help you throw the paper ball successfully into the trash can. You can see all camera views on the box on the down-left corner of the screen.

The default one is the normal view. In the normal view, you see the room, the paper ball and the trash can as if you were in the table.

The "Top View", is positioned on the roof, seeing the table with the paper ball, and the trash can.

The "Trash View" lets you see from the perspective of the trash can.
